PIYUSH SINGH

Flutter Developer • Mobile App Engineer • CoreNova Tech Founder

singhpiyush2604@gmail.com • +91 8983302922 • Mumbai, India • piyushsingh2604.github.io

Shipping real products since college • 3 live apps • 2 companies

PROFESSIONAL SUMMARY

Results-driven Flutter Developer with 1.5+ years of hands-on industry experience delivering cross-platform mobile applications to real users on Google Play and the App Store. Specialized in Flutter/Dart, Firebase ecosystem, offline-first architecture, and scalable state management. Built and published 3 personal apps and contributed to enterprise-grade products across healthcare, field operations, and ed-tech — all while pursuing a B.Sc. IT degree. Passionate about crafting high-performance, pixel-perfect experiences that solve real problems.

WORK EXPERIENCE

Partical 14

Nov 2025 – May 2026

Flutter Developer • Mumbai, India

- Engineered and shipped production Flutter features serving live users across iOS and Android platforms.
- Partnered with design and product teams in Agile sprints to translate wireframes into pixel-perfect UIs.
- Built reusable API service layers and integrated third-party SDKs, reducing development time across features.
- Championed clean architecture by leading code reviews and enforcing best practices team-wide.
- Resolved critical performance bottlenecks — measurably improving app startup time and crash stability.

Anjita IT Solutions

Nov 2024 – Sep 2025

Flutter Developer • Mumbai, India

- Delivered cross-platform Flutter apps published on both Google Play Store and Apple App Store.
- Architected state management using GetX and Provider patterns, boosting app scalability and code clarity.
- Integrated Firebase Auth, Firestore, and Push Notifications for real-time, secure user experiences.
- Collaborated with UI/UX designers to implement responsive, high-fidelity interface components.
- Diagnosed and eliminated production-critical bugs across iOS and Android through systematic debugging.
- Incorporated continuous user feedback into iterative development cycles, improving retention metrics.

KEY ACHIEVEMENTS

- ◆ 3 apps live on Play Store & App Store
- ◆ 11 Indian languages localized in 1 app
- ◆ 3 health APIs unified in single codebase
- ◆ 2 companies hired while in college
- ◆ Offline-first arch with zero data loss

ARCHITECTURE

- ◆ GetX
- ◆ Provider
- ◆ BLoC
- ◆ MVVM
- ◆ Clean Architecture
- ◆ Offline-First
- ◆ Repository Pattern

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Code Review
- Agile / Scrum
- Self-motivated
- Fast Learner

KEY PROJECTS

Writemate

Play Store

Founder & Solo Developer · CoreNova Tech

A location-based marketplace connecting students with skilled writers for assignments, essays, projects, and creative writing needs. Designed and built end-to-end as a solo developer — from UI/UX design to Firebase backend. Features smart geo-location matching to discover nearby writers, profile browsing with writing sample uploads, and direct call/chat communication. Built with a focus on data security, smooth UX, and accessibility for student users.

[Flutter · Dart] [Firebase] [Geo-Location] [Real-time DB] [Solo Build] [Published]

Jai Respi App

Play Store · App Store

Enterprise Field Reporting Platform

Internal field reporting and real-time activity tracking system for registered operatives. Designed and implemented an offline-first data architecture enabling seamless report capture without internet connectivity, with automatic background sync on reconnection — ensuring 100% data integrity and zero loss. Standardized reporting templates across distributed field teams, significantly improving operational accuracy and transparency.

[Flutter · Dart] [Offline-First Arch] [Firebase Sync] [REST API] [GetX] [Enterprise]

HUMRAHI — Health Companion App

Play Store · App Store

Healthcare · Multilingual · Cross-Platform

Comprehensive health management platform for patients managing diabetes, cardiac conditions, and cholesterol — featuring real-time health trackers (BMI, sugar, steps, cholesterol). Integrated Health Connect, Apple Health, and Fitbit APIs into a single unified step-counter. Implemented rich health data visualizations using fl_chart. Fully localized into 11 Indian languages with a custom-built multilingual search engine, expanding accessibility to hundreds of millions of regional-language speakers across India.

[Flutter · Dart] [fl_chart] [Health Connect] [Apple Health] [Fitbit API] [11-Lang L10n]

WHAT MAKES ME DIFFERENT

- ★ Solo-built and published a live marketplace app (Writemate) — product thinking, not just coding.
- ★ 3 apps on Play Store / App Store as a 2nd-year student — proven ability to ship, not just build.
- ★ Unified Health Connect + Apple Health + Fitbit in one Flutter codebase — rare cross-platform depth.
- ★ Localized an app into 11 languages with custom search — engineering for real-world scale.
- ★ Hired by 2 companies while studying full-time — trusted by industry before graduation.
- ★ Offline-first architecture with zero data loss — production-grade engineering mindset from day one.
